1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Howell in view of Marinco Catalog.

Howell discloses the basic claimed structure port including a lens and inner and outer plastic frame members. Not disclosed by Howell is a metal trim piece. Marinco Catalog teaches a port trim piece. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the port of Howell with a trim piece as taught by Marinco Catalog for better appearance. Additionally, it would have been an obvious choice of engineering design to a person of ordinary skill in the art at the time the invention was made to form the trim piece of metal for improved appearance.

3. Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-8, 12, and 13 are allowed.

5. Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities
